Özet

I am a Software Developer who wants to learn all the professional requirements of Web Development. I already have expert knowledge about Front-End Development and its required components such as HTML, CSS, and JavaScript. In Back-End development, I have medium-level PHP experience and my goal improve my skills in PHP and Back-End of the web. I am a student of everything in software, and I want to have sufficient knowledge of other programming languages in the future.
